

Payment Security and Fraud Prevention

Document ID: PY-003 | Version 3.2 | Effective: 1 January 2026 | Department: Payments

1. How Daraz Protects Payments

- Card payments use 3D Secure with an OTP sent by the bank
- Card data is processed by PCI-DSS compliant partners; Daraz stores only the last 4 digits and card brand
- All traffic between the app and servers uses TLS encryption
- Suspicious transactions are flagged by an automated fraud system

2. What Daraz Will Never Ask

Daraz staff, riders and support agents will never ask for: your account password, full card number, CVV, PIN, bank login details or OTP (except the delivery OTP shared with the rider at handover).

3. Common Scams

Scam	How to Recognise It
Fake prize calls	Caller says you won a prize and needs a fee or OTP
Fake seller links	Seller sends a link outside Daraz to pay
Refund scam	Caller claims to process a refund and requests OTP
Fake support numbers	Numbers found on social media pages not verified by Daraz

4. Reporting Fraud

If a customer suspects fraud, they should immediately contact support, block the card with the issuing bank, and change the Daraz password. Suspected fraud cases are reviewed within 24 hours, and confirmed unauthorised transactions are refunded within 10 working days.

5. Account Protection

- Enable two-step verification in Account > Security
- Use a strong, unique password
- Do not log in on shared devices
- Review login notifications sent by SMS

6. Order Holds for Verification

Some orders may be placed on hold for up to 24 hours for verification. The customer may be asked to confirm the order by phone or WhatsApp. Orders that cannot be verified are cancelled and refunded.

7. Double Charges

Duplicate charges for the same order are reviewed within 5 working days, and the extra amount is refunded to the original payment method.
