

Refund Timelines

Document ID: RF-002 | Version 3.2 | Effective: 1 January 2026 | Department: Refunds

1. How Timelines Work

The refund timeline starts on the day the refund is initiated (after quality check for returns, or after confirmation for cancellations), not on the day the return was requested. Timelines are in business days and exclude Sundays and public holidays.

2. Timeline by Refund Method

Refund Method	Expected Time After Initiation
Daraz Wallet	Instant to 1 business day
JazzCash / Easypaisa	2-4 business days
Bank account transfer (COD orders)	5-7 business days
Debit card	7-10 business days
Credit card	7-14 business days
Bank transfer (online banking)	5-7 business days

3. End-to-End Example

A customer returns a phone on Monday. The parcel reaches the warehouse on Wednesday, and quality check completes on Friday. Refund is initiated on Friday. If the customer chose Daraz Wallet, the money appears by Saturday (Sunday excluded). If the customer chose a credit card, the money may take up to 14 business days, so around the third week of the month.

4. Timeline by Scenario

Scenario	Time to Initiate Refund
Cancellation before shipment (prepaid)	Within 24 hours
Undelivered order	Within 3 working days of lost status
Return passes QC	Within 2 working days
Seller does not respond to dispute	After 2 working days

5. Delayed Refunds

If a refund has not reached the customer after the maximum timeline for their method, they should contact support with the refund reference number. Daraz will request a bank trace and provide an update within 3 working days. For credit card refunds, customers should also check with their bank, as statement posting can take extra days.

6. Wallet Preference

Choosing Daraz Wallet is the fastest option. Wallet balance can be used immediately on future purchases and does not expire for 12 months. Wallet funds can be withdrawn to a bank account on request, subject to the standard 5-7 business day timeline.
