

Seller Policies and Code of Conduct

Document ID: SL-002 | Version 3.2 | Effective: 1 January 2026 | Department: Sellers

1. Core Principles

Sellers must act honestly, deliver on time, and treat customers fairly. They are responsible for the accuracy of their listings, the quality of products and the conduct of any staff.

2. Order Handling Deadlines

Action	Deadline
Confirm a new order	Within 24 hours
Hand parcel to logistics partner	Within 2 working days
Respond to customer chat	Within 24 hours
Respond to a return dispute	Within 2 working days
Provide replacement or refund approval	Within 3 working days

3. Authentic Products

All products must be genuine. Brand authorisation may be requested at any time. If a product is reported as counterfeit and verified, the customer is refunded in full, the listing is removed and the seller is penalised under the Seller Penalty Policy (SL-004).

4. Pricing Rules

- The listed price must be the final price; hidden fees are prohibited
- Fake discount markups (raising the price before a sale) are not allowed
- Sellers must honour the price at the time of order even if it is changed afterwards
- Price or stock errors are the seller's responsibility

5. Returns and Refunds

Sellers must accept valid returns under the Return Policy (RT-001). A seller may dispute a return within 2 working days of receiving the item, with photo evidence. If a seller fails to respond, the return is accepted automatically. Sellers may not ask customers to cancel or change the return reason.

6. Customer Communication

Sellers must not ask customers to pay outside the Daraz platform, share personal phone numbers for off-platform deals, or ask for positive reviews in exchange for gifts or refunds. Violations can lead to immediate suspension.

7. Packaging

Products must be packed securely with protective material. Fragile items must be marked Fragile. Invoice and warranty cards must be included where applicable.

8. Account Sharing and Accuracy

A seller account may not be shared or transferred. Information provided during registration must remain accurate; changes to bank account or business details require re-verification and a 7-day payout hold.
